Catalogue

OUR VISION:
LEAD THE INDUSTRY WITH ADVANCED TECHNOLOGY!
EARN THE TRUST WITH BEST QUALITY!
REWARD THE CUSTOMER BY QUALIFIED SERVICE!

- 面包簧/Bread spring • 云朵弹簧/Cloud spring • 羽柔系列/Feather soft series
- 曲线双层/Curve double layer • 无胶/No glue • 可拆解/Detachable
- 迷你簧/Mini spring • 轻量化/Lightweight • 环保棕/Green brown

佛山市域富家具有限公司

FOSHAN WINFAST FURNITURE CO.LTD

尺寸可定制
Any Size is Available,can be customized

透气不易生菌不易塌陷
Breathable,no breeding bacter ,no easy sagging

透气不易生菌不易塌陷
More clean,better ventilation

无胶水无化学材料环保
No glue,No toxic chemical composition,
enviromental friendly

01

面包簧 Box spring

打造透气性高舒适性强的床垫舒适层环保不变形广泛使用在高端床垫，汽车坐垫沙发坐垫等产品。

Create a high air permeable comfortable mattress comfort layer, environmentally friendly, no deformation, widely used in high-end mattresses, car cushions, sofa cushions and other products.

强化用户体验效果
Better experience

简化产品结构
Simple structure

可部分代替舒适层
Can replace other comfort layer(partly)

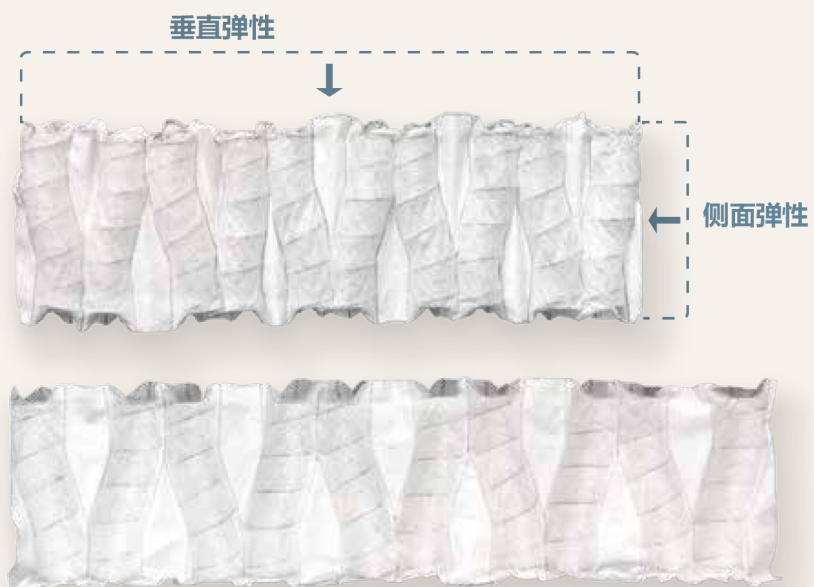

提高物料综合利用率
Improve the utilization of materials

02

云朵弹簧 Cloud foam spring

棉袋中填充碎海绵碎乳胶公仔棉等达到高舒适要求的同时简化生产工序，只需外部套上床袋即可使用大大节约了生产成本特别适用于电动床。
Cotton bags filled with crushed sponge, crushed latex, cotton, etc. to achieve a high level of comfort and simplify the production process, can be used after putting on the bed covers, saving production cost. Particularly suitable for electric beds.

高尺寸型
Tall Version

低尺寸型
Short Version

加强稳固性型
Strengthened Version

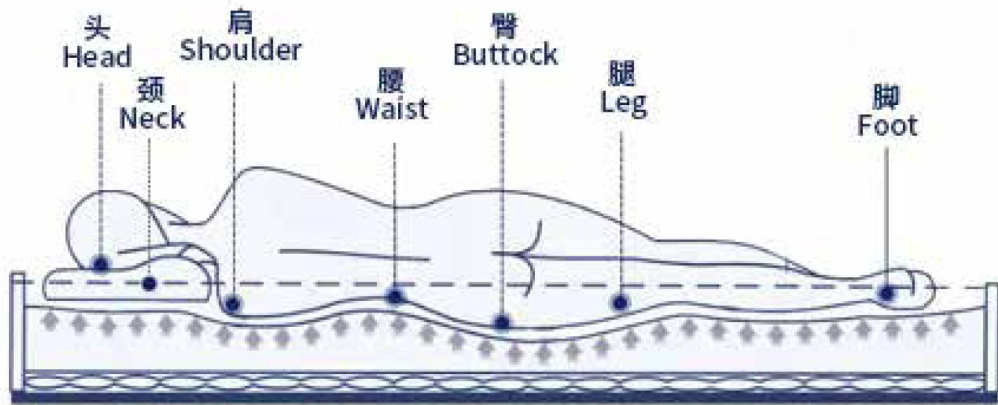

03

羽柔系列 Cozy plume

倾斜且内置丰富缓冲空间的结构能适应体验者的体型使体感压力进一步降低平均能降低20%-30%材料成本。

It can be adapt to customer's shape and decrease further stress by the structure with inclined and considerable buffer space. Reduces material costs by an average of 20-30%.

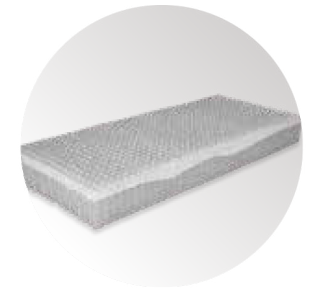

一人一垫量身定制
One person one mattress Customization

舒适 Comfort

分区 Zoning

环保 Eco-friendly

04

曲线双层 Double layer

根据人体曲线以及受力点大小不同定制不同曲线床网更舒适支撑力更科学。

Customized mattress with different curves according to the curves of the body and the size of the pressure points, for more comfort and reasonable support.

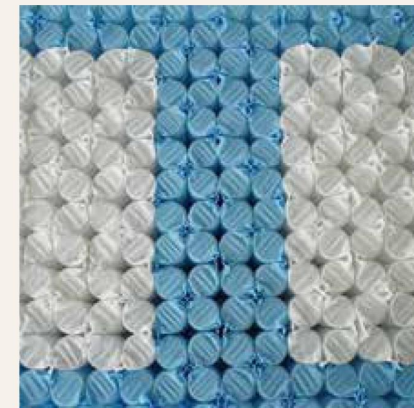

绿色环保
Eco-friendly

超强独立性
Super independence

便捷
Convenient

符合日本欧盟环保
Meets JapanEU environmental standards

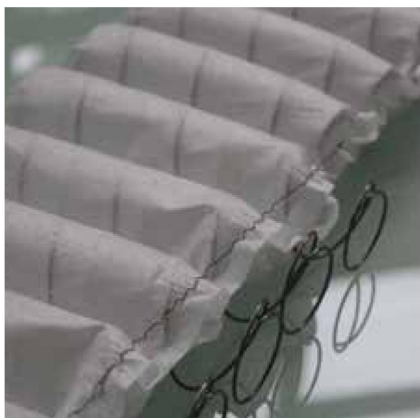

05

无胶 Glueless

采取特殊超声波焊接技术完全不使用胶水幸运四叶草造型弹簧之间具有超强的独立性符合市场对绿色环保的需求。

Adopting special ultrasonic welding technology, glue-free, the lucky clover shape, with superb independence between the springs, meets the market demand for a green environment.

拉线拆解
Pull thread dismantling

可分区
Zoning

可居家分拆
Home dismantling

环保
Environmental friendly

06

可拆解床网 Mattress with dismantling function

采用缝纫技术代替超声波焊缝具有可拆解功能实现居家一线拆解弹簧和布轻松分离便于回收,十分符合美日欧市场环保再生理念。

Adopting sewing technology instead of ultrasonic welding, with dismantling function, it can be dismantled by one thread, easy separation of springs and cloth, easy to recycle, in line with the concept of environmental protection; in line with the concept of environmental protection in the American, Japanese and European markets.

舒适
Comfort

高压缩
High compression

高弹力
High resilience

受力点分布密集
Dense distribution of stress points

07

迷你簧 Supermicro spring

弹簧压缩30-40mm,一张床垫有3-4000只弹簧受力点分布密集适合做高硬度高弹力的高端床垫产品。

High compression ratio springs. A mattress with 3-4000 springs, with a dense distribution of stress points, suitable for high-end mattresses with high firmness and high elasticity.

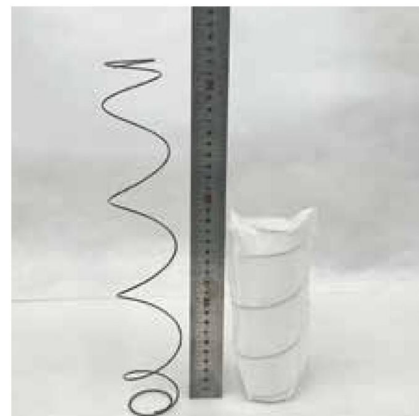

整体轻量化
Overall lightweight

细钢丝代替粗钢丝
Thin wire instead of thick wire

高压缩比高回弹力
High compression ratio, high resilience

专利技术
Patented technology

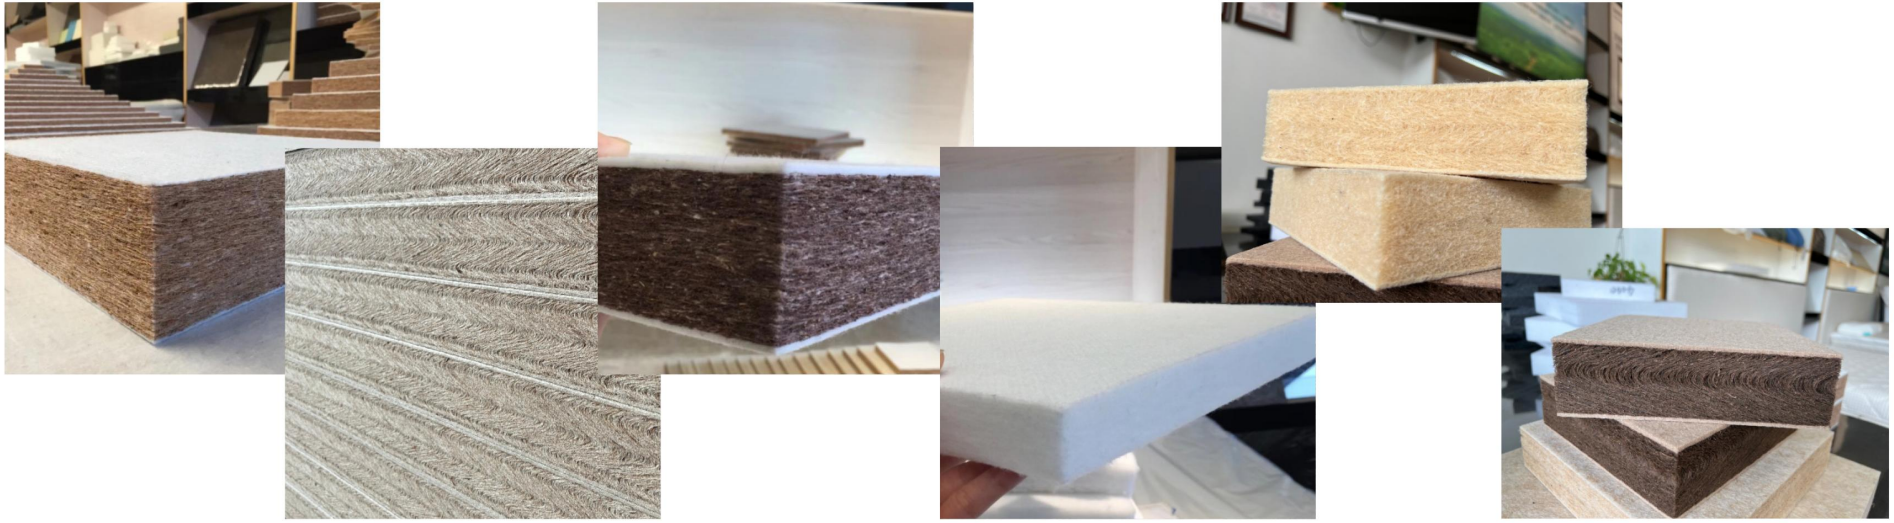

08

轻量化弹簧床网 LIGHTWEIGHT POCKET SPRING UNIT

产品采用最先进的专利高压缩比技术入袋后弹簧压缩比例高达50%-60%高压缩高回弹能使用细钢丝代替粗钢丝例如1.7线可以达到跟1.9线的弹簧同样的回弹力支撑力从而实现了床网的轻量化降低约15-25%左右材料成本和运输成本。

The product uses the most advanced patented high compression ratio technology, with a spring compression ratio of 50% to 60% after pocketing, high compression, high resilience. Thin wire can be used instead of thick wire, 1.7mm wire can reach the same rebound and support ability as 1.9mm wire, the pocket spring unit is thus lightweight, reducing material costs and transport costs by around 15-25%.

09

环保型棕类产品 LIGHTWEIGHT POCKET SPRING UNIT

产品原料取自原生态棕树,经特制冲压工艺,形成各种棕类产品,域富工艺使用的原料均为天然环保原料,且性能稳定,深受消费者喜爱!

The raw material of the product is taken from the original ecological palm tree. Through the special stamping process, various palm products are formed. The raw materials used in the Yufu process are all natural environmental protection raw materials with stable performance and are deeply loved by consumers!

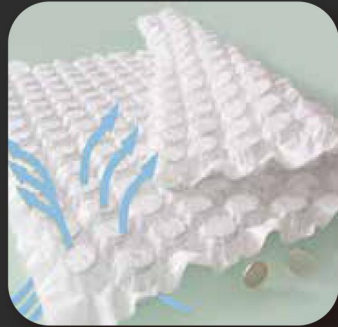

welcome to order
